Applicant's arguments filed 8-4-03 have been fully considered but they are not persuasive.

Applicant's arguments with respect to claims 1-14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

All previous rejections are hereby withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Lamberts et al.(5,428,077).

Lamberts et al. disclose preparations of polyurethane foams by combining and/or reacting isocyanates, polyol compositions as defined by applicants' claims, water, catalysts, flameproofing agents, alkane blowing agents, and additives (see column 3 line 6 et seq., column 4 in its entirety, 4 line 51, Example 1, as well as the entire document).

Lamberts et al.'s teaching must be taken for what it teaches as a whole and for its references within. It is not limited to its examples, and, therefore, the reference is encompassing of preparations of polyurethane foams beyond the rigid foams. Further, the reference is comprehensive in its teaching of the additional materials used in the

Art Unit: 1711

polyurethane art, and these materials are held to be encompassed by Lamberts et al.'s teachings.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 and 16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 and 12-14 of copending Application No. 10/242,741. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims differ in a manner which would have been obvious to one having ordinary skill in the art with the variability of rigid to flexible foams being within the skill of the ordinary practitioner in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
